

Jinwoo Cho

jimy12181218@gmail.com | linkedin.com/in/heyjinwoo | github.com/superjin1218 | Open to work

A CS-Backed Future Financier doing blockchain, finance and data research. I design data collection-classification-analysis pipelines end to end and turn complex financial and on-chain phenomena into conclusions anyone can act on.
Currently open to opportunities in blockchain, finance and data.

EDUCATION

Inha University

B.S. in Computer Engineering (in progress)

- GPA 3.96 / 4.5 · Certified Investment Manager (KOFIA, 2025)
- Focus: blockchain/on-chain analysis, quant & econometrics (CGE), machine learning, data pipelines

Incheon, Korea

Mar 2023 – Present

Finance AI Lab, Inha University

Undergraduate Researcher · sites.google.com/view/inha-ai-f-lab

Incheon, Korea

Feb 2025 – Jul 2025

EXPERIENCE

BLUENODE – Inha University Blockchain Society

Research Team Lead & Onboarding Team Lead

- Lead the research & onboarding teams; own BLUENODE's research direction and output quality

Incheon, Korea

Jan 2026 – Present

StockTalk Inha – Inha stock open-chat

Founder & Operator

- Grew the community to 670+ members
- Run the 'jo식이야기' stock blog (2022–) — equity/macro/on-chain analysis, 30,000+ cumulative views

Incheon, Korea

2024 – Present

Incheon Bugwang High School

Blockchain Teaching Assistant

Incheon, Korea

Apr 2026 – Present

I.T.T – Incheon Inter-University Stock Club

Team 3 Lead

Incheon, Korea

Mar 2025 – Dec 2025

Republic of Korea Air Force

Vehicle Operator · Discharged as Sergeant

Korea

2021 – 2023

HONORS & AWARDS

2026 Arbitrum Mini Hackathon 1st (STARK zk Coprocessor) · 2025 K-SURE Big-Data Analytics — Grand Prize · 2025 23rd Korea Economics Paper Competition — Excellence (K-content CGE) · 2025 Korea Digital Contents Society Summer Conf. — Silver · 2025 WorldQuant Challenge — Stage 2 · 2025 Advantech Korea AIoT — Finalist · 2024 Growthon Ideathon — Grand Prize · 2024 Agthon — Excellence · 2024 DB Gaps Investment — Finalist · 2023 Sangmyung-Inha AWS — Top 6 · 2023 CFA Research Challenge — Completed

SKILLS & ADDITIONAL

Languages	Python, C++
Blockchain · On-chain	Ethereum, Dune, DefiLlama, on-chain data analysis, stablecoins
Data · Research	Data pipelines, big data, quant, CGE, forecasting
Finance · AI	Asset management, market research, algo-trading, Bitcoin strategy backtesting (win-rate/return) · ML, AI agents/harness, extensive LLM & MCP experience
Additional	Certified Investment Manager (KOFIA, 2025) · ROK Air Force, Sergeant, service completed (2021–2023)

BLOCKCHAIN RESEARCH ACTIVITIES

details on p. 2

- x402 Payment-Risk Insurance & LLM Attack Agent** — Designed an LLM-based AI attack agent and an insurance product covering x402 payment risk via EIP-8003.
drive.google.com/file/d/1QBu2g5MNHgGPfqteeq4ImjBN0ytXp1iy/view
- K-Onchain Repo Market** — A concept migrating Korea's short-term funding market (repo/RP) on-chain.
drive.google.com/file/d/1xg-MrQOMHZtQsNxSA9s5sbZdXKPlxOs/view
- Bitcoin Whitepaper — Deep Analysis** — An onboarding-grade explainer of Satoshi's whitepaper (PoW, timestamp, consensus, UTXO).
hanglestocks.tistory.com/138
- Arbitrum Mini Hackathon — STARK zk Coprocessor (1st)** — Poseidon/Merkle/STARK verification in Stylus (Rust/WASM), gas-benchmarked vs Solidity.
github.com/superjin1218/starkverifier
- RWA-based Blockchain Factoring** — On-chain factoring of tokenized real-world receivables (RWA structured finance).
drive.google.com/file/d/1C3rAW4sV6jALgqVdFfJWazPTCQdRs00G/view
- Toss Own-L1 Strategy Analysis** — Market + technical analysis and recommendations on Toss launching its own L1.
drive.google.com/file/d/1UrKtpdbaH4kS2r7J0gdySmLxr42CFZxO/view
- The Void of Trust and Bitcoin** — A monetary-history essay on the trust shift from gold to the dollar to Bitcoin.
medium.com/@seyunjeong158 · 신뢰의 공백과 비트코인
- Trustless DeFi Trading-Agent Verification** — Applied STARK to trading-agent verification, proving a speed advantage over SNARK.
drive.google.com/file/d/1Uob-Y7LN-tRjcVZFIOFRBI2HTdAmn3J8/view

09 **USDC vs USDT On-chain Analysis** — A dashboard comparing issuance, market cap and on-chain activity (USDC leads 90-day growth, USDT leads volume)

01 x402 Payment-Risk Insurance & LLM Attack Agent

CONCEPT · DESIGN

A product structure that insures payment risk in the x402 (agent/machine payment) protocol on-chain.

- **FOCUS** x402 failure/abuse scenarios, plus coverage, triggers and settlement leveraging EIP-8003.
- **METHOD** Built an LLM-based attack agent to surface vulnerable scenarios, then mapped the risks onto an EIP-8003 insurance structure.

drive.google.com/file/d/1QBu2g5MNHgGPfqteeq4ImjBN0ytXp1iy/view

02 K-Onchain Repo Market

CONCEPT · DESIGN

A market structure that migrates Korea's short-term funding market (repo/RP) on-chain.

- **FOCUS** Trade/collateral/settlement mechanics of Korea's repo/call market and the structure, pricing and risks of going on-chain.
- **METHOD** Decomposed the off-chain RP transaction and mapped collateral, maturity, repurchase and rate-setting onto smart-contract logic.

drive.google.com/file/d/1xg-MrQOMHZtQsNxSA9s5sbZdXKP1xOs/view

03 Bitcoin Whitepaper — Deep Analysis

ARTICLE · EDUCATION

An onboarding-grade explainer of Satoshi's whitepaper covering PoW, timestamping, consensus and UTXO.

- **FOCUS** The paper's core mechanisms — PoW, timestamp chain, consensus, double-spend prevention, UTXO.
- **METHOD** Decomposed the original paragraph by paragraph, rebuilt with accessible examples, published as an explainer.

hanglestocks.tistory.com/138

04 Arbitrum Mini Hackathon — STARK zk Coprocessor

AWARD · 2026 (1ST)

An on-chain zk coprocessor performing STARK verification, built in Stylus (Rust/WASM) — 1st place.

- **FOCUS** Feasibility and gas efficiency of running Poseidon-hash / Merkle / STARK verification on-chain.
- **METHOD** Implemented verifiers in Stylus (Rust→WASM) and gas-benchmarked vs an equivalent Solidity build, quantifying the advantage.

github.com/superjin1218/starkverifier

05 RWA-based Blockchain Factoring

CONCEPT · DESIGN

A structured-finance design that tokenizes real-world receivables and factors them on-chain (RWA).

- **FOCUS** Cash-flow and credit risk of receivables factoring, recomposed via tokenization and on-chain funding.
- **METHOD** Decomposed an off-chain factoring deal and designed the on-chain flow of tokenization, verification, funding pool and repayment.

drive.google.com/file/d/1C3rAW4sV6jALgqVdFfJWazPTCQdRs00G/view

06 Toss Own-L1 Strategy Analysis

ANALYSIS · RECOMMENDATION

A market and technical analysis and recommendation on Toss's strategy to launch its own L1.

- **FOCUS** Market positioning, technical options and business/regulatory risks if Toss launches its own L1.
- **METHOD** Analyzed competing chains, stablecoins and payments alongside L1 architecture to derive scenarios and recommendations.

drive.google.com/file/d/1UrKtpdbaH4kS2r7J0gdySmLxr42CFZxO/view

07 The Void of Trust and Bitcoin

ESSAY · MACRO

A monetary-history essay tracing the transfer of monetary trust from gold to the dollar to Bitcoin.

- **FOCUS** The shifting 'anchor of trust' from gold to Bretton Woods to the petrodollar to the U.S. strategic BTC reserve.
- **METHOD** A data-grounded argument built on public data (IMF COFER, U.S. debt, China's UST, stablecoin T-bills, BITCOIN Act), deriving a hypothesis and scenario.

medium.com/@seyunjeong158 · 신뢰의 공백과 비트코인

08 Trustless DeFi Trading-Agent Verification

CONCEPT · DEMO

Applying STARK to trustless verification of a trading agent's behavior, proving a speed advantage over SNARK.

- **FOCUS** A verification structure proving — without trust — that an agent acted according to the rules, plus a STARK-vs-SNARK performance comparison.
- **METHOD** Designed the agent's execution to be verified by a STARK circuit and benchmarked proof speed against SNARK.

drive.google.com/file/d/1Uob-Y7LN-tRjcVZFIOFRBI2HTdAmn3J8/view

09 USDC vs USDT On-chain Analysis

DASHBOARD · DATA

A dashboard comparing USDC and USDT by issuance, market size and on-chain activity.

- **FOCUS** Net issuance, market cap, growth rate and on-chain volume of the two stablecoins.
- **METHOD** Built a metrics dashboard from aggregated on-chain data; USDC leads 90-day net issuance & growth, USDT leads absolute volume.
